

Required Installation:

It is run on Python 3.9.7

It requires tk library. If it is not installed, run the below command:

`pip3 install tk`

A terminal window with a dark background and light text. The title bar at the top shows three colored circles (red, yellow, green) on the left, the text '-zsh' in the center, and a window icon with the number '2' on the right. The terminal content shows 'Last login: Sat Feb 26 00:49:23 on ttys001'. Below this, there is a prompt 'home ~' followed by the command 'pip3 install tk'. The output of the command is 'Requirement already satisfied: tk in /opt/anaconda3/lib/python3.9/site-packages (0.1.0)'. Another prompt 'home ~' is visible below the output, followed by a green checkmark icon and a cursor.

Code Directory:

The directory has “main.py”, “rrs.sql” and “rrs.db”, “readme.pdf”

rrs.db is the backup database. So, the program can be run without restoring database from “rrs.sql”

To Run the program:

Navigate into the “code” directory and run the below command:

`python3 main.py`
