

Chinook SQL Query Questions

1. Which countries have the most Invoices? Use the Invoice table to determine the countries that have the most invoices. Provide a table of BillingCountry and Invoices ordered by the number of invoices for each country. The country with the most invoices should appear first.
2. Which city has the best customers? We would like to throw a promotional Music Festival in the city we made the most money. Write a query that returns the city that has the highest sum of invoice totals. Return both the city name and the sum of all invoice totals.
3. Who is the best customer? The customer who has spent the most money will be declared the best customer. Build a query that returns the person who has spent the most money.
4. Use your query to return the email, first name, last name, and Genre of all Rock Music listeners. Return your list ordered alphabetically by email address starting with A.
5. Which musicians are writing/playing rock music? Now that we know that our customers love rock music, we can decide which musicians to invite to play at the concert. Write a query that returns the Artist name and total track count of the top 10 rock bands.
6. Count how many songs based on genre did customer 12 buy?
7. How much did customer 13 spent across genres?
8. How much did each customer spent per genre?
9. How much money was spent overall on each genre?
10. How much did Americans spent in total?
11. How many users per country?
12. How much did users spent total per country?
13. how many songs per genre the music store has?
